TURBOJET

4 - STROKE JET TENDERS

Williams Performance Tenders are the World's leading jet tender specialists. Our extensive knowledge of the yacht industry has led to the development of the Jet and Turbojet™ range of tenders, designed to perform a range of functions from utility vessel to high performance waterski boat. Supreme stability at all speeds, great carrying capacity, and high performance from the low emission/low fuel consumption 4-stroke engine are features which have been engineered into our boats through constant development.

Our purpose built facility in Oxfordshire is staffed by a dedicated team of professionals with a passion for the boats they are building. Each tender undergoes an on-water test procedure prior to dispatch, ensuring that every aspect of its construction is checked and meets the high standard set by Williams.

Williams features

- Industry first 4-stroke parallel twin engine, producing 72hp – 98hp.
- Closed Loop cooling system with heat exchanger.
- Ultra Low Emissions.
- Advanced axial flow jet pump with stainless steel impeller.
- Excellent fuel economy for long range cruising.
- Secure, comfortable central driving position.
- Unique seating layout for optimum weight distribution, balance and extra carrying capacity.
- True sports boat hull shape for cornering grip and directional control.
- High performance, speeds up to 42 knots.
- Supreme stability at all speeds.
- Monocoque construction ensuring inherent rigidity and buoyancy even without tubes.
- Removable tubes for practicality.

The Tender of Choice

As yacht owners discover the capabilities of the Williams tender, it becomes an increasingly important aspect to their boating. Many of the World's leading yacht builders have recognised the crucial part that a tender plays in their customers' boating experience. This has led them to recommend Williams as the jet tender of choice.

Williams are able to offer yacht builders and their clients a range of custom options designed to tailor the tender to the parent yacht.

Williams engineers are working with yacht builders in the design of garage systems to ensure that launch and recovery is a simple and smooth operation.

By choosing a Williams tender for your new yacht, you can be sure that you are in good company.

MOTOR BOAT & YACHTING

"The Williams Turbojet comes closest to being all things to all people. It is perfectly possible to use it for simple ferrying duties one minute then take your teenage kid out for a hair-raising wakeboard ride the next. It is the current King of jets."

Williams Performance Tenders supply over 25 yacht builders Worldwide including:

TURBOJET 285

The Jet 285 and Turbojet™ 285 open up a world of fun to yacht owners. Lightweight and compact, they are suitable for fitment aboard many mid-sized production yachts either in the garage or positioned on the bathing platform. They will fire up at a turn of the key and immediately settle into a quiet unobtrusive idle, but throw open the throttle and hold on for a truly exhilarating ride.

Powered by our 72hp 4-stroke engine, the Jet 285 has a level of performance which belies its size, and thanks to its sports hull the Jet 285 will hold tight in turns even if driven hard, giving an experience akin to riding a fast motorcycle. Wakeboarders and waterskiers will delight in her ability to track in a straight line. Able to carry three adults with ease, the Jet 285 can be used for general ferrying duties making her a great practical choice. Also available is the Turbojet™ 285 which shares all the innovative features of the Jet but with the addition of a 98hp turbocharged engine for extra performance.

The unbeatable Jet 285.

TURBOJET 325

The Turbojet™ 325 will rocket from standstill to 20 knots in four seconds flat and won't stop until the far side of 40 knots.

In common with the entire Turbojet™ range, such performance is made possible by the torquey 98hp Weber engine driving through a high performance jet pump system. The Turbojet™ 325's spacious layout can accommodate four adults and one child in comfort, with luggage stowed in the forward locker and under the central seat. Her hull length promotes excellent low speed planing ability, giving a supremely stable platform for safe embarking/disembarking.

As with all Turbojets the fuel economy is impressive, giving extended use between refuelling for true coastal cruising capability.

A qualified choice for the discerning yacht owner.

TURBOJET 385

Leave the yacht at anchor and explore further afield with the Turbojet™ 385. Stylish and practical, the Turbojet™ 385 is the leader of the pack. Her sports boat hull gives truly awesome open water performance and a breathtakingly smooth ride, and with seating for five adults and one child plus storage, this tender has capacity beyond her size making her the definitive yacht tender. As with any Williams tender there are a number of colour options available, enabling an owner to match their parent yacht, or to create a personalised look.

Power, precision and purpose for the larger yacht – The Turbojet™ 385.

NEW FOR 2008

www.williamsjettenders.com

TURBOJET 445

The new Turbojet™ 445 shares many of the market leading features of the existing range but with increased seating capacity, more storage space, and a host of innovative features and options. A new high torque jet pump and an expanded seating area enables the Turbojet™ 445 to carry six adults and one child in comfort. This increased thrust also delivers plenty of top end speed for waterskiing and fast coastal cruising, making the Turbojet™ 445 a truly versatile utility yacht tender.

Specifications: LOA 4.45m. Beam 1.96m. Height from keel to steering wheel 1.02m. Dry Weight 395kg. Seating 6 adults + 1 child. Fuel capacity 70 litres. Typical Fitments Yachts 20m plus.
